PROJECT PROFILE

Current Project : Digital Transformation for Direct Energy Inc., US

SERVER	Debian based GNU/Linux
Scripting Languages	BASH
Database	MySQL ,MariaDB with SHARDING, Phinx migrations
Web Framework	Core PHP , CakePHP , CodeIgniter, HTML , jQuery , CSS
Duration	May 2014 – Till date

Direct Energy generates electricity and produces natural gas, as well as selling commodities and servicing the energy needs of homes and businesses in 46+ U.S. states. Direct Energy is a subsidiary of Centrica plc (LSE:CNA), one of the world's leading integrated energy companies with over 20 million customers and 34,000 employees worldwide.

This project is all about the transforming the Direct Energy's business into Digital. Digital Transformation is all about focusing towards Web & Mobile and improve digital sales. The day-to-day activities includes adding new features to web portal and maintenance as well as support towards business operation people over intranet portals

We're dealing with processing over 6 million customers data in efficient manner, so that the end user feels the better service. Reduced number of hits (up-to 30%) on Prod DB by bringing out new **Replica** architecture and routing all read-only connections to replica. Playing around tools with **Vagrant** & making minimal to zero dependency on Dev server. DB alterations only by means **Phinx** for better collaboration. Handling SOAP Communications over WCL reaching CIS vendors like Peace , Discovery during Order enrollments and account managements.

The overall goal is Direct,Simple & Friendly. Moreover as a part of Prod support which comes with strict SLA on inflowing incidents, need to monitor the entire systems and to be proactive towards the system.

1) PROJECT DESCRIPTION : **HP Compare for Optum/UnitedHealth Group , US**

SERVER	RHEL5.6 GNU/Linux
Scripting Languages	Perl, KSH
Database	Sybase
Duration	Nov 2013 – April 2014

United Behavioral Health uses HPCCompare as a tool for exchanging Member eligibility and group information between its Behavioral business and Medical vendors. HPCCompare acts as a central platform for all group and member eligibility loading. It enables the business to easily monitor the status of groups and members as they travelled between UBH and its trading partners. HPCCompare also supports operational work flows such as error handling and status

2) PROJECT DESCRIPTION : **Connectivity Director [2.X,3.X,4.X -13.4]** for **OPTUM,US**

SERVER	GNU/Linux RHEL5 with Apache
Scripting Languages	PHP , Perl,BASH & JavaScript
Database	MySQL 5.5
Framework	Zend Framework 1.6
UI Markups/Tools	HTML, XML , JS , PHPUnit
Customers	Aetna / Uniprise
Duration	March 2008 - Nov 2013

Connectivity Director (CD) is a three tier architecture (Presentation, Application & DB) system used to transport health care EDI files directly between submitters and the payer. Key Components of CD are Admin Portal and Trading Partner Portal(TPP). This version of CD comes with **Automated Unit Testing** reduces the time in delivery process by minimizing the need of QA resources. The SOAP calls defined for the product are tested against cases pre-defined data, stored in a database.

Scope of Generic Connectivity Director:

- Strong support towards 5010X12 Files & Multiple Transaction types
- Automated security scanning with FORTIFY
- Improved reporting, administrative and TPP UI

ROLES AND RESPONSIBILITIES IN THE PROJECT:

- Perform On-site and Offshore coordination on regular basis.
- Handle the Scrum meetings, Sprint Retrospective items.
- Responsible for implementation of offshore review process, checklist & other quality guidelines set for the project.

3) **CommunEDI Premium 1.4** for **OPTUM,US**

CP 5010 Provider Self-Testing Application for Transaction Exchange Clearinghouses.

- Perform On-site and Offshore coordination on regular basis.
